FRS 139 Financial Instruments : Recognition and Measurement

With the adoption of FRS 139, the Company classified all its financial assets and financial liabilities recognized and unrecognized in the prior year into categories that would conform to the FRS. The measurement bases applied to the financial assets and financial liabilities in the prior financial year are changed to conform to the measurement standards of FRS 139 in the current quarter.

At initial recognition, all financial assets and financial liabilities are measured at their fair value plus transaction costs that are directly attributable to the acquisition or issue of financial asset or financial liability.

AJINOMOTO.

Subsequent to the initial recognition, the financial assets and liabilities are measured as follows:

	Category	Measurement Basis
1.	Financial Instruments at fair value through profit and loss	At fair value through profit and loss
2.	Held-to-maturity investments	At amortised cost using effective interest method
3.	Loans and Receivables	At amortised cost using effective interest method
4.	Available for sale Investments	At fair value through other comprehensive income, unless fair value cannot be reliably measured, in which case, they are measured at cost.
5.	Loan and other financial liabilities	At amortised cost using effective interest method other than those categorized as fair value through profit and loss.

The Company has applied the new policies in relation to the financial instruments above in accordance with the transitional provisions in FRS 139 by recognizing and re-measuring all financial assets and financial liabilities as at 1 April 2010 as appropriate. The related adjustments to the previous carrying amounts are made to the opening retained earnings and fair value reserves as appropriate and the comparative figures are not restated.

Following the adoption of FRS 139, the Company's quoted/unquoted investments are now categorised as Available for Sale Investments. Accordingly the opening balance is stated and measured at its fair value as at 1 April 2010 and subsequent measurement of the fair value is reflected in equity through the other comprehensive income.

1 Review of Performance

For the first financial quarter ended 30 June 2010, the Company recorded an increase of RM10.8 million or 15% growth in revenue as compared to the previous corresponding quarter. Improvement in sales from both domestic and export markets together with higher productivity and lower raw material prices have contributed significantly to improved earnings.

2 Material Changes in the Quarterly Profit Before Taxation Compared to the Results of the Preceding Quarter.

Compared against last quarter, revenue was higher by 14% representing an increase of RM10.2 million, as compared to RM71.9 million achieved in the preceding quarter as a result of improvement in both domestic and export sales. Profit before tax for the quarter under review was substantially higher than the preceding quarter by RM9.4 million, principally due to higher sales and lower selling expenses incurred in the current quarter as compared to the high expenses incurred from intensified selling and promotion activities during last quarter. 3 Commentary on Prospects

The recent fuel and sugar price hike, and the Government's plan to reduce subsidies may have an impact on domestic consumer spending, though the move is seen by some to be positive in the long term. At the regional level, growth momentum seems to continue to be low as fiscal policy support diminishes. The remaining fiscal year will be challenging and the Company will continue to adopt innovative sales and marketing strategies, improve further the supply chain management and increase productivity to achieve cost efficiency and further enhance the value chain to protect and expand its market share.
